Suleman Saddet

New Brunswick, NJ | 732-801-3570 | sulemansaddat@hotmail.com | LinkedIn: linkedin.com/in/sulemansaddet

Summary

Data-driven Supply Chain professional with hands-on experience leading SCM operations, executive-level reporting, business intelligence analysis, and data-driven process improvement initiatives across procurement and logistics. Proven ability to translate complex supply chain data into actionable insights leading demand and supply planning, supporting Monthly Business Reviews, inventory optimization, and operational decision-making. Demonstrated informal people leadership, cross-functional collaboration, and a strong growth trajectory toward supply chain operations and data analytics.

Professional Experience

Panasonic North America – Newark, NJ

Supply Chain Planner | June 2024 – Present

- Collaborate with sales, product management and finance teams to perform monthly demand and supply planning of factory and third-party models to determine order rates for the coming six months.
- Design, own, and present Monthly Business Review KPI dashboards and analytics, performing cross-BU backlog and spend analysis by material group, aging, and value to support executive decision-making using Power BI, SAP, Salesforce, and Anaplan.
- Lead development of Slow-Moving Stock (SMS) analysis for 3–4 business units, enabling SCM leadership to make strategic inventory risk mitigation and redeployment decisions.
- Improved planning performance by increasing forecast accuracy to 80–90%, reducing backorders by 20–30%, optimizing weeks of supply, and narrowing demand-supply gaps through KPI-driven analysis and cross-functional collaboration.
- Lead and maintain strong partnerships with external vendors to improve order lead times and reporting timeliness, facilitating monthly touch-base meetings and serving as the primary point of accountability.
- Support data governance and master data quality initiatives by correcting vendor records, SKU setup files, and system inputs to ensure reporting accuracy.
- Train, coach, and supervise Supply Chain interns, providing onboarding, weekly feedback, task reviews, and performance improvement guidance.
- Reduce aging in-transit open orders by 70% to 90% monthly through proactive order management.

Panasonic North America – Newark, NJ

Supply Chain Co-Op | April 2023 – May 2024

- Provided support to the Supply Chain team in placing and updating purchase orders for vendors and factories.
- Supported end-to-end tracking and expediting of third-party vendor invoice payments, driving a reduction in aging payments by more than 60%
- Tracked and traced inbound shipments and proactively follow up with vendors to obtain proof of delivery for timely internal inventory accounting.
- Identified pricing and order quantity discrepancies and worked with appropriate internal and external stakeholders to reconcile.
- Ran SAP reports and data analysis to support Supply Chain team in making quantitative decisions.

Sabert Corporation — Sayreville, NJ

Sustainability Intern | May 2022 – Aug 2022

- Led a large-scale research effort analyzing 450+ MRFs and recycling organizations across North America to evaluate market coverage and material recovery capabilities.
- Collected qualitative and quantitative insights through direct outreach to facilities, identifying partnership opportunities and plastic commodity trends.
- Built Excel-based analytical reports and presented findings and industry insights to the CEO and executive leadership to inform strategic assessment of launching an in-house recycling facility.

Analytics & Transformation Projects

- Vendor RFP Projects: Supported evaluation of multiple vendor RFPs by analyzing historical spend and demand data and comparing proposals across cost, lead time, and service metrics to enable informed vendor selection.
- Third-Party PO Track and Trace Project: Led a data-driven initiative by designing a custom SAP report variant to improve visibility of third-party POs and ETAs; trained the logistics team on report usage, enabling self-service tracking and reducing manual status follow-ups by approximately 35–45%.
- Third-Party Software/Service PO Automation: Supported design of an automated PO issuance process by applying Lean Six Sigma DMAIC principles to map current-state manual workflows using Visio (eliminating 5–8+ non-value-added steps) and define a future-state, SAP-integrated solution consolidating 3–4 application data streams, standardizing processes across teams and supporting a targeted 40–50% reduction in PO cycle time upon implementation.

Education

Master of Science – Data Science | University of Michigan – Flint | Jan 2026 – Present (Part-time)

Relevant Coursework: Object-Oriented Java Programming (AI, Machine Learning & Data Engineering – upcoming)

Bachelor of Science – Business Admin. in Supply Chain and Data Management | Monmouth University, Leon Hess Business School | Sept 2020 – May 2024

Minor: Information Technology | GPA: 3.85 / 4.0

Relevant Coursework: Quantitative Analysis for Business, Business Statistics, Operations Management, Supply & Logistics Management, Management Information Systems, Data Management, Adv. Informational Technology

Skills

Analytics & BI: SAP S/4HANA, Salesforce, Anaplan, SQL, Power BI, Java, Tableau, Advanced Excel (PivotTables, Power Query, Lookups)

Supply Chain: Procurement & Logistics Analytics, Planning & Forecasting, Inventory Management, Data Quality & Governance

Communication: Executive Reporting (PowerPoint), Cross-Functional Collaboration, Vendor Coordination, Interpersonal skills
